The resource X contributes/ does not contribute to the historic significance of this historic district in:

 X Location X Design X Setting X Materials

 Workmanship Feeling Association

Justification for decision: (Use continuation sheet if necessary and attach map)

The house at 19017 Sandy Hook Road contributes to the National Register eligible Sandy Hook district in terms of location, design, setting and materials. The late 19th century house is located on Sandy Hook Road, the main road of the linear village, and contributes to the streetscape. The frame house is similar in appearance to its log and stone neighbors. Most of the houses in the village are one-and-one-half or two stories, three or five bays with gable roofs paralleling the road and single story front porches, varying only in construction material and minor details. As with many of the houses in the district, this house has had new windows and artificial siding installed. However, it still retains the original form and has sufficient integrity to contribute to the district.

Documentation on the property is presented in: Project File, WA-III-116

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The frame house is a two-story, three-bay structure with a one-story, two-bay addition on the west gable end. The structure is covered in a modern aluminum siding. The main facade is symmetrically arranged and has a full-length one-story porch. The windows and door frames have plain trim. The structure appears to date from the late 19th century.

The property is located on the south side of Sandy Hook Road, .18 mile east of Clark Road, in Sandy Hook. The house is sited close to the road but on a sloping site that puts the house at a lower level than the road. The main facade faces north.

The two-story main section of the house is constructed of frame covered in aluminum siding on a fieldstone foundation. The structure has a central entrance with one-over-one sash windows in the outer bays of the main story and the three bays of the second story. The full-length, one-story front porch is supported on square posts. The porch continues along the two bays of the one story addition. The one story addition has a side entrance and one-over-one sash windows. The structure has an exterior-end wide brick chimney on the east gable end. The west gable end of the one story addition has a exterior-end concrete block flue.
